

TOUR & TAXIS

A GENUINE MASTERPIECE OF CIVIL ENGINEERING WHICH IS HOME TO CULTURAL EVENTS, SHOWS, FAIRS AND EXHIBITIONS.

You have undoubtedly been here for a cultural event or festival, but can you imagine that this place is more than a hundred years old?

The Sheds were built between 1903 and 1904 according to the plans of architect Van Humbeek, and cover more than 17,410 m².

From the platforms alongside, where trains deposited their goods, you can admire the astonishing self-supporting metallic framework, displaying a technical prowess unique in the world. Thanks to the glazing with which it is covered, the sawtooth roof evenly spreads natural light.

A genuine masterpiece of civil engineering which is home to cultural events, shows, fairs and exhibitions.

Walk through the tunnel which connects the Royal Depot to the Sheds and discover yet another side of Tour & Taxis.
