

COVID MEASURES

**SPECIAL MEASURES TO ORGANIZE
SAFE EVENTS AT THE EGG BRUSSELS**

INTRODUCTION

The EGG Brussels and its platform StaySafe Events has the mission to help you to organise safe corporate events, to show how to stay safe as a participant / event organiser and provide you concrete and innovative digital solutions for your conferences in the deconfinement period.

Covid-19 obliges everyone to show full responsibility and caution. It is a delicate moment for everyone. The EGG Brussels are fully aware of the challenge to organise conference and events during the Covid-19 pandemic.

For this reason, we put in place several measures to help you to welcome your conferences and events in our venue.

Depending on the period you will organise your event, we will analyse and adapt our approach to guarantee the security and health of every visitor. Our venue managers and partners will help you to organise or reorganised your event with digital solutions in place and respect social distancing with our playground of 5000m².

COVID-19 MEASURES AT THE EGG BRUSSELS

1 ENTRANCE “CHECK-IN”

To ensure the safety of all the visitors we install a check-in control zone. To be allowed to get in the conference centre we will:

-  Check your temperature by non-contact camera
-  Use an alcohol-based hand sanitizer (available on site)
-  Recommend / obligate mask wearing (depending on government obligations)
-  Organise a counting system to ensure social distancing

2 TRAFFIC FLOW “COVID-19”

The EGG Brussels is limited in number of visitors. The flow has been reorganised in the venue to limit cross-circulation. You will be guided by our **digital signage** and **stickering** on the floor to show the new rules of movement around the venue and the respect of social distancing.

3 RESPECT 1,5M OF SOCIAL DISTANCING

We have adjusted our capacity chart to respect social distancing guidelines of 1,5m. Discover the new allowed number of people on page 7.

4 DIGITAL MEETING OR HYBRIDE EVENTS

As market leader in events technology, our technical partner PRG transform our different rooms in **digital studios for hybrid conferencing** and offers streaming packages already on site. These innovative measures help you to stay connected with your audience. Discover [HERE](#) the streaming packages already on site.

5 STAYSAFE.GUIDELINES

In partnership with the Alliance of Belgian Event Federations, we are collaborating on an instrument called the Event Risk Model, to safely relaunch the event sector. More info will be communicated once this model is officially approved by all authorities. In the meantime you can find a roadmap the Event Alliance created with how to cope with corona virus in the event & communication sector.
